CORZO Xcountry-SE 30 CORZO Xcountry-SE 34 CORZO Xcountry-SE 38 CORZO Xcountry-SE 42

„Multipurpose foldable rehab-buggy“

Popular line of multipurpose rehab-buggies CORZO is now available as well as in Special Edition with the state of the art design outfit.

Wide range of multipurpose rehab-buggy CORZO is manufactured in 4 sizes (30, 34, 38 and 42). Buggy is determined for a short-stay usage of children with special needs, e.g. during the transportation, shopping, ..etc. Buggy line is based on well approved fully foldable undercarriage of specific authentic design, which is produced from lightweight alloy profiles with powder coating finish. Chassis is equipped with optimized buggy-folding system, wheels of 200 / 260 mm, light frame, 5-point fixation ensuring high safety and comfortable handling, high maximum load (up to 75 kg - sizes 38, 42) and very easy folding. Those features make the products very well suitable for in-town conditions and public transportation, but as well as for light outdoor activities. Despite all the advantages of the buggy-folding, CORZO Xcountry – products line preserves as well as the positioning and the “growing” advantages of the standard rehab-strollers, such a seat depth adjustment, height adjustable backrest, height adjustable footrest and backrest height extension (size 38, 42 only). Wide variety of sizes and modifications ensure fulfilling of majority requirements of user’s wide spectrum. The correct usage of the product should be consulted with a seating specialist. The products corresponds to the newest EC standards as well as hygienic, technical and safety requirements.

Standard equipment:

- seat depth adjustment
- height adjustable backrest
- fully height adjustable and foldable footrest
- backrest angle adjustment (2 positions)
- backrest height extension (size 38, 42 only)
- 5-point safety harness with crotch belt and shoulder padding
- 200 mm front / 260 mm rear solid wheels
- cover patterns and frame colours according to current offer

Optional equipment:

- hood
- comfort seat cover
- 2-piece flip-up footrest
- headrest, abductor, side trunk rest, fixation waistcoat, H-style harness, foot fixation, and other positioning accessories according to the actual list

Wide variety of fixation devices and accessories as an optional equipment (ask for accessory actual list and leaflet)

Standard foldable footrest or 2-piece flip-up footrest on request.

SUCCESSFULLY CRASH TESTED

The product had been successfully crash tested and fulfilled all the requirements of EN ISO 7176/19. It enables to use the rehab-buggy not only for a common duty, but as well as for the transportation in specially adjusted motor vehicles, equipped with the anchoring points and equipment.

TOM 5 Streeater MAXI

wide flexibility, easy adjustments, user friendly manipulation with seat-unit and undercarriage

High-tech full-aluminum chassis of the TOM 5 stroller is produced by the new high-tech ALUX production method, which takes advantage of an aluminum alloy and a titan joint hardener combination. ALUX method ensures chassis low weight and high durability.

Fully foldable chassis includes among others new well designed chassis to seat interface, safe brake-system, spring-suspension, ergonomically shaped handlebar with the height adjustment.

100% ALUX full-aluminum seat is as well as produced fully by high-tech ALUX production method. Seat-unit is detachable, reversible and fully size and position adjustable. It includes not only highly innovative MONOSLIDE design, but as well as easy tilt-in-space telescope operated system and well approved flexible system for attaching of fixation devices and positioning accessories. Seat shell is covered by fully detachable soft padded textile upholstery in fashionable design. Easy handling is ensured as well as by the stroller's fully foldable frame even with attached seat.

Stroller TOM 5 has been designed in cooperation with professional designers and seating specialists and it excels not only in design but as well as in use value – it is one of the lightest strollers in the category. Additionally 260 mm (175/260 mm) solid wheels enables usage of the product not only in town but as well as for the light outdoor activities. The correct usage of the product should be consulted with a seating specialist.

The product corresponds to the newest EC standards as well as hygienic, technical and safety requirements.

„Multipurpose fully foldable rehab-stroller“

TOM 4 Xcountry - facelift version of very popular fully adjustable rehab-strollers for handicapped children is based on improved design of the TOM-line undercarriages with 300 mm (200/300 mm) wheels, that enables usage of the products in town and as well as for outdoor activities.

Fully foldable spring-suspensioned undercarriage is produced from lightweight thin-walled tubes with powder coating finish. Undercarriage includes new chassis to seat interface, new brake-system, ergonomically shaped height adjustable handlebar. Redesigned seat-unit is detachable, reversible and fully size and position adjustable. It includes as well flexible system for attaching of fixation devices and accessories. Seat shell is covered by fully detachable soft padded textile upholstery in fashionable design. Easy handling is ensured as well by the stroller's fully foldable frame even with attached seat. All products correspond to the standard hygienic, technical and safety requirements.

folded rehab-stroller

Sizes MINI, STD, MAXI are produced with front fixed wheels or swivel castor-wheels, size SuperMaxi 42 only swivel castor-wheels

wide variety of fixation devices and accessories as an optional equipment (ask for accessory actual list and leaflet)

SUCCESSFULLY CRASH TESTED

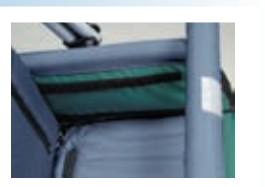

The product had been successfully crash tested and fulfilled all the requirements of EN ISO 7176/19.

It enables to use the rehab-stroller not only for a common duty, but as well as for the transportation in specially adjusted motor vehicles, equipped with the anchoring points and equipment.

FlexiPads set

Set of side width-defining pads enables very flexible width-adjustments of the seat in accordance to the present requirements of user by maximum of 50 mm. FlexiPads set consists from side pads of different width and density, 6 pieces in total.
